

# 2010 **ASHRAE/ASPE** **Product Show**

**Central Florida Fairgrounds---May 11<sup>th</sup>, 2010**

The Central Florida Chapters of ASPE and ASHRAE have once again partnered to put on a combined product show for the engineering community. This event has previously been well received and attracts engineers/designers/contractors/owners from all over Central Florida. By purchasing a booth at this show, member sales reps, vendors, manufacturers, etc. can display new products and distribute literature to the people who need it most.

Who benefits from a show like this? EVERYONE!

A variety of vendors set up displays under one roof making it easy to come and get the information you need. You can experience products first hand and have questions answered from the people who are in the know. Sales representatives can meet with the engineers who are specifying equipment and meet them one on one eliminating the hassles of driving around trying to set up appointments.

The deadline is drawing near and we ask all of our membership to participate. Early registration is until March 10. ASPE and ASHRAE members have always looked forward to this event in previous years and attendance is always high.

Please, fill out your registration form and get your space reserved. We are hoping once again for a sold out show and we can't do it without the support of the reps and vendors and the support of the members participating.

It's a winning situation for all involved. *Attached are forms for registration, building layout, and information about the theme of the show.* Keep in mind that when you fill out the registration form, your first or even second choice of booth may have been sold, especially the longer you wait to register. We look forward to seeing everyone participate in another outstanding ASHRAE/ASPE Product Show!

Thank You for your support,

**American Society of Plumbing Engineers  
Central Florida Chapter**
